

The Center for Prevention & Counseling presents

# Fatal Vision and Marijuana Goggle Training

**Become trained in these useful prevention tools!**

Fatal Vision Impairment Goggles are a hands-on prevention tool used to educate people of all ages about the consequences of alcohol misuse and abuse. Participants experience how alcohol impairs a person's balance, vision, reaction time, and judgment.

The Fatal Vision Marijuana Simulation Experience is a hands-on awareness building tool that models the distorted processing of visual information, loss of motor coordination, and slowed decision making and reaction time resulting from recreational marijuana use.

**Tuesday, May 16th - 10:00am-1:00pm**

**The Center - Satellite Office  
65 Newton Sparta Rd, Newton**

**Please RSVP by contacting Annmarie at 973-383-4787  
or [annmarie@centerforprevention.org](mailto:annmarie@centerforprevention.org)**
